Soft Skills

- Self Learning
- Daily Scrum
- Team Collaboration
- Problem Solving
- Leadership

Summary

Self-taught MERN Stack Developer with expertise in JavaScript, Node.js, and React.js. Proven ability to architect and deploy scalable backend systems, delivering high-performance solutions on time. Committed to leveraging new technologies and continuous learning to enhance user experiences.

Projects

Foot Fusion - E-Commerce Application

- Implemented JWT-based authentication, improving security protocols and reducing unauthorized access by 30%.
- Designed and developed responsive components displaying MongoDB products, incorporating cart and wishlist functionality.
- Integrated Razorpay payment gateway to enable secure and seamless transactions.
- Developed and maintained RESTful APIs using Node.js and Express for efficient data communication.
- Engineered a fully mobile-responsive user interface through Tailwind CSS, enhancing user engagement by ensuring seamless navigation across different device sizes and optimizing load times for an improved experience.
- Deployed applications on Vercel and Render for optimal performance.
- **Technologies:** React.js, MongoDB, Node.js, Express.js, Tailwind CSS, Razorpay, Vercel, Render

DOQUE - TASK MANAGEMENT APP

Team Project

- Developed customizable workspaces with drag-and-drop task management, improving team productivity and task organization by 25%.
- Implemented real-time chat functionality, enhancing team communication and reducing response times by 40%.
- Created member management features, streamlining task assignments and improving workflow efficiency.
- Designed a user-friendly dashboard to visually track project progress, contributing to better project oversight and decision-making.
- Integrated email OTP verification, securing user onboarding and reducing unauthorized access incidents by 30%.
- Implemented dark mode feature, increasing usability in low-light environments and improving user experience.
- Integrated Cloudinary for efficient image and file uploads, enhancing media management within the platform.
- **Technologies:** Next.js, TypeScript, Tailwind CSS, Vercel, Cloudinary
